

DHISCO switch

Business is booming. The global market for hotel stays is at an all-time high. According to STR, Inc., in the U.S. alone we've seen the highest annualized occupancy, at 65%, and the highest room demand at 99.4 million.

This level of success is dependent upon optimized distribution, rich content, an up-to-the-millisecond cache, and crazy fast shopping and booking. DHISCO Switch captures all of these elements. Think of it as a connectivity hub—a single electronic interface allowing you to link your hotel properties or your distribution solution into a network around the globe.

DHISCO Switch was developed for the sole purpose of facilitating these bookings. We're proud to deliver the perfect one-to-many distribution solution, whether you have an OTA in the cloud, a hotel chain in Vancouver or GDS in Texas.
